

TS600B Electric flat lift with integrated auto-stop function

TS600B is a very slim, flat-lift/TV-lift designed for use in TV beds, kitchen cupboards and other furniture, where slimness is of high importance.

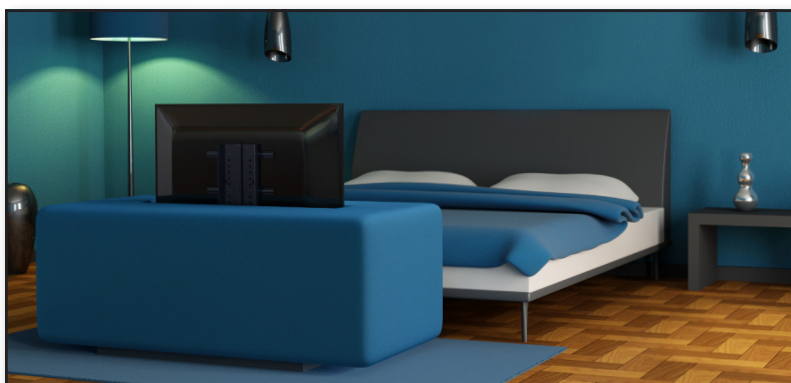

The back of the TS600B is flat without any protruding screws or intrusive features, which makes this lift perfect in environments where the lift is visible from the back side.

Key features:

- Maximum thickness just 45 mm
- Minimum installation height of only 50 cm
- 60cm of travel from 50cm to 110cm height
- Automatic anti-squeeze auto-stop safety
- Easy to adjust endstops, so you can set the height range
- Can be used upside down, downside up and horizontal
- Peak/working load: 15 kg/12 kg (see specification)
- Controlled with rocker switch

Optional features:

- RF remote control
or IR infra-red remote is optional
- Lid lifter
- VESA TV/monitor bracket MB600 that fits the VESA standards:
200x200
200x100
100x100

TS600B Electric flat lift with integrated auto-stop function

Component specifications

Metal sheet parts:	St 37-2
Gear parts:	St 70-2
Gear motor:	EM 130960
Power supply:	70W AC SMPS Power Transformer
Plastic components:	PEHD, POM
Surface treatment:	Visible metal parts powder coated in black Non visible metal parts are surface treated (e.g. plated)
Lifting capacity:	5-12 kg
Height:	500-1100 mm
Depth:	4,5 cm
Speed:	40 mm/sec

The electrical components can be connected once the lift has been mounted.

The mechanism can be operated up and down using the supplied rocker switch.

A manual with all needed information about the assembly is supplied with all products.
