

Compact solutions for smaller screens

The M Series is a Cartridge-type lift, which can be mounted very easily in any furniture. It requires only a rectangle hole in which you need to mount the lift - and that's about it. Button operated, has an active RJ-45 Port for all the Sabaj Accessories. Perfect for lifting PC screens and smaller TVs. Conference rooms most favourite - possibility to set a one-triggers-all manner, so you can place unlimited numbers of those in a line. Can also be used in kitchens, living rooms and offices. Anywhere you might need hiding your screen and having a flat table. Equipped in the most popular small-screen VESA mounts - from 50x50 up to 200x200.
