

SCREEN LIFT 750 ELECTRIC WALL MOUNT

Height adjustable wall mounted screens provide the end user with excellent flexibility especially when using touch screen technology. Perfect for collaborative learning, presentations and digital signage, the height adjustment allows the screen to be positioned in just the right place, every time. When used, the white bracket set compliments light coloured walls for a discreet installation.

Like all Loxit products the wall mounted stand features 'smart design' - with universal screen mount brackets for VESA mount sizes up to 800mm wide and up to 440mm high as standard and with 120kg max screen weight on the Screenlift 750, virtually all makes and models of screen can be mounted to the same lift. Plus, our 'Easy Install Kit' ensures a simple, fast and accurate installation every time. The standard 40mm deep wall brackets may be swapped for the optional 100mm brackets to offset the lift from the wall to accommodate existing wall features such as dado rails and electrical trunking.

With a large range of accessories including wall mounted laptop shelves, speaker shelves, extension legs, power management, Mac Mini and Apple TV clamps, the Screen Lift 750 Electric Wall Mount provides an extremely flexible solution.

12 month warranty - a comprehensive return to base warranty applies to all our screen lifts.

Power up - 4 way power bar may be installed inside the motor body ensuring only one cable is required to operate the installation.

750mm height adjustment - huge height flexibility means all users are able to access the screen.

Go configure - user configurable maximum and minimum heights on the Screen Lift 750 may be set to allow the safest operation possible.

Clean lines - simple, space saving design leaves clear access under the screen.

Neat and tidy - cabling is hidden behind the frame. The frame itself is powder coated to deliver a neat and tidy solution.

Easy install - each Screenlift 750 comes with it's own self-jigging Easy Install Kit to ensure a perfect installation in the fastest possible time.

Easy install - each Screenlift 750 comes with it's own self-jigging Easy Install Kit to ensure a perfect installation in the fastest possible time

Smart design - the Screenlift 750 optional extra deep 100mm wall brackets may be specified where dado rails or electrical trunking are present and need to be avoided.

Additional safety - an optional Anti-Crush bar may discreetly mounted to the underside of the screen. As the screen is lowered if it touches an object, the anti-crush device kicks in. The lift stops instantly, reverses its motor, raising the screen by 30mm and cuts the power.

Solid performance - ideal for rooms with a fixed point of display for the screen where the wall is constructed from brick or block suitable to fix in to.

Simple to install - excellent fixing positions for all types of wall. Where the lift may not be fixed to a wall, extension legs are available to transfer the load to the floor.
